BSc Computer Science

WORK EXPERIENCE

Dimiour - Vdart

Remote

Frontend Developer Intern

Feb 2024 - Jul 2024

- Utilized React, HTML, and JavaScript to develop reusable components, streamlining development processes and reducing time-to-market by 30%.
- Deployed Redux and Redux-Toolkit (RTK) to streamline state management across web applications, achieving a 30% reduction in bug reports and ensuring smooth, predictable data flow for improved performance.
- Crafted modern interfaces seamlessly with CSS and Proficient in CSS library TailwindCSS for styling and Figma for intuitive design, marrying creativity with functionality.
- Authorizations using modern mechanism like JSON web token (JWT).
- Integrating and consuming REST APIs to fetch, display, and manipulate data within web applications, ensuring seamless user interactions and data flow.

Glyph Ads

kerala

Web developer

Apr 2023 - Feb 2024

- Developed custom websites for 10 small businesses, resulting in an average increase of 30% in online sales and a decrease in bounce rate by 20%.
- Developed and deployed a cutting-edge mobile application using React Native, resulting in a 50% increase in user engagement and retention metrics.
- Git Proficiency: Ensuring code version control and smooth collaboration with Git.

PROJECT EXPERIENCE

Glyph Ads

kerala

E-Commerce Website leveraging Reactjs and Redux

- A fully functional e-commerce website leveraging Reactjs and Redux with features like product listing, shopping cart, and Wishlist.
- Searching functionality using name of product as a keyword.
- Utilized TailwindCSS to design and style user interfaces efficiently, leveraging its utility-first approach to rapidly build responsive and customizable components while maintaining a streamlined and maintainable CSS codebase.
