

ASIF RAHMAN

FRONTEND DEVELOPER

+91 8547296707 | aasifpty@gmail.com | [LinkedIn Profile](#)

EDUCATION:

Farook College Autonomous - Calicut University

2020 - 2023

Bachelor of Computer Science

WORK EXPERIENCE:

Dimiour - Vdart

Feb,2024 - Jul, 2024

Frontend developer Intern

- Utilized **React**, **HTML**, and **JavaScript** to develop reusable components, streamlining development processes and reducing time-to-market by 30%.
- Experienced in implementing state management using **Redux** and **Redux -toolkit (RTK)**, ensuring efficient data flow and predictable state containers in web applications.
- Crafted modern interfaces seamlessly with **CSS** and Proficient in CSS library **TailwindCSS** for styling and **Figma** for intuitive design, marrying creativity with functionality.
- Git Proficiency: Ensuring code version control and smooth collaboration with **Git**.
- Authorizations using modern mechanism like **JSON web token (JWT)**.
- Integrating and consuming **REST APIs** to fetch, display, and manipulate data within web applications, ensuring seamless user interactions and data flow.

Project Experience:

E-Commerce Website

E-Commerce Website leveraging Reactjs and Redux for State management

- A fully functional e-commerce website leveraging Reactjs and Redux with features like product listing, shopping cart, and Wishlist.
- Searching functionality using name of product as a keyword
- Utilized TailwindCSS to design and style user interfaces efficiently, leveraging its utility-first approach to rapidly build responsive and customizable components while maintaining a streamlined and maintainable CSS codebase.

Gemini Clone

- Developed a clone of Gemini using the **Gemini API**, a lightweight and efficient protocol for accessing and sharing information over the Internet.
- Implemented features such as browsing, navigating, and retrieving content using the Gemini protocol standards.
- Technologies Used: Gemini API, React Js, TailwindCSS.

Mordern Blog website

Modern website created using Reactjs and Redux for state management.

- Implemented advanced filtering and search functionalities on a modern website created using Reactjs and Redux-toolkit, enhancing user experience by enabling seamless navigation and quick access to relevant content.
- Authorization using JSON web token
- Developed a robust categorization system for blog posts using keywords.

TECHNICAL SKILLS:

- Web Development using Reactjs,HTML and javascript
- Experience with popular React.js workflows such as Redux,Redux-toolkit
- Creating great UI/UX Design
- Proficient in CSS framework like Tailwind and Bootstrap.
- Knowledge in RESTful APIs

SOFT SKILLS:

- Excellent communication skills.
- Excellent team player.
- Ability to understand business requirements and translate them into technical requirements.
- Experience in benchmarking and optimization.
